Route to Success

ZIMMER AUSTRIA Digital Printing Systems is well known for INNOVATION, QUALITY MACHINERY MANUFACTURING and SERVICES since the first digital printer has been supplied to the market in 1976. Today the company is organized in 5 business segments which are interlinked by the common technology - digital inkjet printing systems and related equipment.

Our five business segments cover expertise in textile prints, floor coverings, narrow fabrics, technical textiles, and special solutions.

READY TO SUPPORT YOU - CHALLENGE US

Through a modular concept, ZIMMER AUSTRIA Digital Printing Systems can offer highly economic solutions to ennoble almost any printable substrate with a creative image. Starting from print preparation to the finished product, all steps of print requirements can be carried out as a multi-step offline solution, or in many cases even as an all-inline processing solution.

Economic and ecologic needs or even logistic challenges are more and more demanding for process integration. Such prerequisites demand for complex, all-in-one production solutions. Compiling the best layout for our customers' individual needs is what our passion triggers and what fuels our enthusiasm.

Modularity - the key to success

It starts with an application system which offers sufficient flexibility to cover any product from flat weaves, knits, voluminous textiles such as velour, terry fabric and plush substrates. Leather and fur as well as woven, raschel, tufted or nonwoven carpet constructions are rounding up the portfolio of digital printing machinery.

No matter what end-products are considered, through constant R&D work in our Digital Technology Center we can offer environment-friendly, sustainable solutions, fine-tuned to our customer's requirements.

Although our main product range is digital printing machinery with associated post print and finishing equipment, we additionally offer back coating lines for carpets, digital coating systems, and various special solutions incl. additive manufacturing for non-textile applications.

ZIMMER AUSTRIA Digital Printing Systems is the competent partner for your success in digital printing and finishing on any kind of textile-based substrate. The complete know-how and machine manufacturing comes from one single source.

ZIMMER AUSTRIA offers:

- · developing the idea
- building the process
- · designing and manufacturing the printer and line components
- installation and commissioning the equipment at the customer's site
- · implementing and transferring the technology and know-how
- · servicing the supplied production lines

We are ready to support you with our vast experience.

Our promise: Whatever your project may be, challenge us!
